Objective

To secure a challenging role as a Software Engineer in a reputed organization where I can utilize my skills in programming, web development, and data analysis to build scalable applications. I aim to contribute to meaningful projects, work on innovative solutions, and continuously enhance my technical and problem-solving abilities while supporting the growth and success of the organization.

Education

Lovely Professional University

Phagwara, Punjab

Bachelor of Technology in Computer Science and Engineering, CGPA: 8.72

Since Aug 2023

Jawahar Navodaya Vidyalaya

Visakhapatnam, Andhra Pradesh

Intermediate, Percentage: 81.0%

Apr 2022 - Mar 2023

Jawahar Navodaya Vidyalaya

Visakhapatnam, Andhra Pradesh

Matriculation, Percentage: 75.0%

Apr 2020 - Mar 2021

Technical Skills

Programming Languages: C++, Python, C, Java, JavaScript, SQL

Tools/Technologies: Flask, Streamlit, HTML, CSS, Bootstrap, React, Tailwind CSS, Power BI, Jupyter Notebook, Git, GitHub, Matplotlib, Scikit-Learn, NumPy, Pandas, Seaborn

Databases: MySQL, PostgreSQL

Projects

Project Title: *Vehicle Tracking & Geofence-Based Auto Trip Closure System*

Description: Developed a geofence-based backend automation system to detect vehicle entry/exit events and trigger automatic trip closure using real-time location data. Designed RESTful APIs for live trip monitoring and status-based state transitions. Engineered an automated trip lifecycle management module by integrating geospatial boundary detection with backend event-driven logic.

Technologies Used: Node.js, Express.js, MongoDB, OpenLayers, REST APIs

Impact/Achievements: Reduced manual monitoring dependency by 70%.

Demo/Code Link: github.com/PavanKalyan1430/MOVE-IN-SYNC-CASE-STUDY-ASSIGNMENT

Project Title: *Resume Ranker: Smart Resume Screening & Ranking Platform*

Description: Built an NLP-based resume-job matching pipeline to automatically evaluate candidate-job fit through contextual similarity analysis. Executed resume parsing and text pre-processing using NLTK, followed by TF-IDF vectorization to enable structured feature extraction. Leveraged cosine similarity to generate Top-K ranked candidate matches.

Technologies Used: Python, Flask, PostgreSQL, NLP, React

Impact/Achievements: Improved screening efficiency by 60% and accelerated shortlisting turnaround by 2x.

Demo/Code Link: github.com/PavanKalyan1430/RESUME---RANKER

Certifications (If Applicable)

Fundamentals of Cloud Computing: Completed Cloud Computing certification. (Aug 2025 - Sep 2025)

Networking Fundamentals | Cisco: Completed Network Fundamentals certification covering network models and troubleshooting.

Data Structure and Algorithm | GFG: Completed Data Structure and Algorithm certification by GeeksforGeeks.

LeetCode Weekly Contest: Secured Global Rank: 7522 (Top 5%). Attained a prominent global rating of 1610.

NPTEL Cloud Computing: Merit Certificate, Secured a top 5% rank at the national level.

Dean's List Recognition: Top 10% - Under Dean's List for academic excellence.

AI Recommendations for Improvement

Recommendation 1: Continuously strengthen backend development and problem-solving skills by building a FastAPI-based project while practicing Data Structures and Algorithms on platforms like LeetCode.

Recommendation 2: Enhance knowledge in Machine Learning and Generative AI by learning core concepts and implementing practical models using Python, along with integrating basic visualization where required.

Recommendation 3: Maintain consistent progress by preparing core computer science subjects including Operating Systems, DBMS, and Computer Networks, and applying concepts through real-world projects and GitHub contributions.

Self-Assigned Tasks (Till 10th week of this semester)

Task 1: Build and complete a FastAPI-based production-level project with features like REST APIs, authentication, and database integration to gain hands-on backend experience.

Task 2: Learn and implement Machine Learning and Generative AI concepts by completing practical exercises, mini-projects, and model implementations using Python.

Task 3: Strengthen interview readiness by solving DSA problems regularly and revising core subjects such as Operating Systems, DBMS, and Computer Networks.

Targets Allocated (Till 10th week of this semester)

Targets Approved by Course Instructor

- o Complete certification in **Generative AI & Machine Learning**
- o Build and complete a **FastAPI-based project**.
- o Achieve strong understanding of **core computer science subjects** for interview readiness.
- o Solve **630+ Data Structures and Algorithms problems on LeetCode**.
